		DAILY FLIGHT PLAN	
Flight:	Squadron:	Prepared by:	Today's Date:
Foxtrot	6 CTS	C/ 2dLt Sarah Westphall	29 July 2001

INSTRUCTIONS: Flight Training Activity (FTA) time is set aside on the daily block schedule to use as the Flight Training Staff sees fit. Use this form to plan that time and make it as productive as possible. This plan is prepared by the Flight Commander, reviewed by the Squadron Commander and briefed to the Flight Tactical Officer. It should be completed prior to the evening Squadron Training Meeting and discussed during that meeting.

This Daily Flight Plan is for (Day):

3, 30 July 2001

FTA time available: Approx. 4 hours

Achieved objectives (What have we accomplished today?)

The cadets are drilling better. They have parts one and two completed in their knowledge books. They have almost mastered columns and flanks, and they are familiar with count off, dress right dress, close and extend march(stationary and marching), and to the rear.

Objectives NOT achieved (What did we plan for, but did not get done?)

The flight hasn't sung any jodies yet. They also haven't mastered saluting. And they are still forgetting to use bug spray for PT and sunscreen all day.

Plan to accomplish missed objectives (What are we going to do to meet the goals the flight has missed?)

I will teach them the Jodie that Lt. Eckers wrote tomorrow. I will also have them fall out when we get outside so they can practice saluting. And I will remind them in the mornings to put on bug spray and sunscreen all day.

Tomorrow's objectives (What training are we going to accomplish?)

I am going to show them where the inspection sheets are and explain how to use them. They will start singing jodies. I will also prepare them for their interaction with the USAF, mostly customs and courtesies.

		Breakdown of tomorrow's FTA time	
From	То	Activity	Time Breakdown
Morning		Inspection Preparation / knowledge books	½ insp. prep.
		Drill: ½ columns, columns, flanks, count off, close/extend march (stationary and	½ drill
		Marching)	
Afternoon		Drill: column, flanks, left and right step, eyes right, and jodies	Most drill
		CC: saluting	Little CC
Evening		Inspection Prep	½ insp. Prep.
		Drill: counter march, hand salute, ½ columns, count off, dress right dress, to the rear	½ drill
		jodies

sees fit. Use this form to plan that time and make it as productive as possible. This plan is prepared by the Flight Commander reviewed by the Squadron Commander and briefed to the Flight Tactical Officer. It should be completed prior to the ever Squadron Training Meeting and discussed during that meeting. This Daily Flight Plan is for (Day): 4, 31 July 2001 Achieved objectives (What have we accomplished today?) The cadets had more inspection preparation time. They sang their first jodie. They were prepared for their interaction with the USAF. They know where the inspection sheets are and how to use them. The all used bug spray and sunscreen, and they filled their canteens more often during the day. And they have mastered columns and flanks. Objectives NOT achieved (What did we plan for, but did not get done?) The cadets did not work on their knowledge books. They only sang one jodie. We did not practice close/extend march(stationary and marching). Plan to accomplish missed objectives (What are we going to do to meet the goals the flight has missed?) I will have them work on their knowledge books before and after the inspections. Some of the flight times moved around and compacted, I will plan better. Tomorrow's objectives (What training are we going to accomplish?) They need more practice with saluting and drill. They also need to use their inspection time more wisely. Breakdown of tomorrow's FTA time From To Activity Time Breakdown of tomorrow's FTA time From To Activity All drills. All drills. All drills. All drills.
